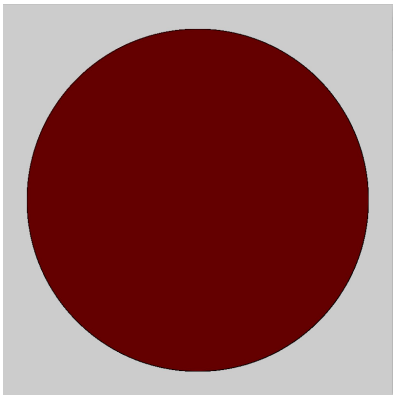
Logical Dot



We are going to make a circle that changes color when you click the mouse.

1. Create `setup()` and `draw()` methods in your Processing sketch.
2. Set the size of your sketch in your `setup()` method to 800, 800.
3. Draw an ellipse in your `draw()` method.
4. Make your ellipse a nice color.
5. In your `draw()` method, make it so that if the mouse is pressed…
6. … you change the color of your ellipse.
