

Venn Diagram of Me

We are going to make a Venn diagram that shows different parts of your personality!

1. Create a new sketch in Processing and add `setup()` and `draw()` methods.
2. Add three overlapping circles to your sketch.
3. Give the circle nice colors using:

```
fill(int red, int green, int blue, int transparency);
```
4. Label each circle with a part of your personality using:

```
text("message", int xPos, int yPos);
```
